

# Alpha Omega Epsilon Iota Chapter

## SISTERS AT WINTER ACTIVE INITIATION

### Aundria

I can't believe another semester's gone! The best part of this year was being MED and helping guide the candidates into sisterhood. I can't wait to see the impact they will make this coming year.

### Kayla

This was my first semester as an active sister and I couldn't be happier! I struggled a little in two classes but with the help of some sisters I managed to get through it and understand material

better. I can't wait to see what the future holds for this sisterhood.

### Kelsey

This semester flew by, but was also very enjoyable. This was my last semester as secretary and I am sad to see it end. However, I am very confident that Fatima will carry on this semester as a great secretary. I cannot wait to see what the fall semester holds for us.

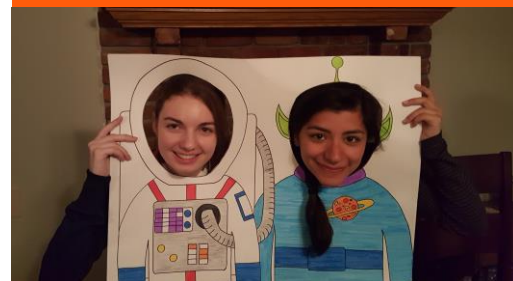

### Fatima

My first active semester was splendid! I loved our space-themed recruitment, the great turn-out we had for MLK Day of Service and initiating our two newest sisters; Morgan and Valeria.

### Stefana

This semester has offered many opportunities. I was able to join women engineers from DTE Energy at the Michigan Science Center to be involved with girls in STEM. We put on a fashion show showing middle school girls what it's like to be an engineer. We modeled PPE clothing and some things that weren't PPE such as a beach hat or flip flops. It was a great experience to have such an affect on younger girls and see how interested they are.

## NEW SISTERS COLUMN

New active sisters at day away

### Morgan

At first I was a little nervous about going through candidacy, but I absolutely don't regret going through it at all. Getting to know all the active members and learning from all of their past experiences with professors and classes, really helped me get through the rest of the semester and help to set me up for the upcoming one.

### Valeria

Candidacy was definitely something I would normally not be able to go through being the introvert that I am. But having met all members and the

chance of getting to know them more was an offer that I couldn't resist. It was a fun experience and I am happy to be in an environment where I feel comfortable to be myself and feel proud and motivated of my profession.
